## INSPIRED BY NATURE

*“The rain dare not slow your steps  
The harsh sun fears to steal the colors you love*

*The germ-free space is a safe haven for children and old  
And no force of nature can harm its texture*

*Nor can any alga mar its beauty  
No amount of pressure can break its strength*

*With the tiles of Casa Yard Collection for your outdoor spaces  
You can rest your feet and revel in the natural surfaces*

*With nature unfolding its majestic splendor  
Creating an ambiance of Rock tones lovely and tender”*

The Casayard Collection is a phenomenal amalgamation of attractive surfaces that translates the beauty of the elements of nature into its full glory through mesmerizing shades, surfaces, and textures. This collection is curated to express the unparalleled architectural vision by allowing design freedom through its contemporary and classy charm.

# Protect

ANTIBATTERICO - ANTIMICROBIAL

S U R F A C E

## TAKING CARE MADE EASY

We are always concerned about our children's and grandparents getting injured from slipping on wet and alga-ridden floors. At Casa, we have created a special kind of matt finish that has anti-slip and anti-alga properties, which will protect your child and grandparents from slipping on wet areas! We are delighted to introduce the 'Protect' surface, developed primarily to save senior citizens and children from falling and getting injured due to wet floors and alga build-ups.

Along with the materials like water, oil, grease, etc. we have also taken care of the elements created by the environmental conditions, like alga, which makes the surface slippery. 'Protect' surface stops the formation and development of the alga and makes it an anti-alga surface. These qualities of the 'Protect' surface make it an anti-skid in the true sense.

## PROTECT SURFACE

To minimise the roughness created by the veins, we apply the unique micro-protect particles that cover the deep valleys creating the smoothest anti-skid surface without affecting the veins.

## APPLYING THE MICRO PROTECT PARTICLES

PUNCH PATTERN

FULL BODY TILES

## TRADITIONAL ANTI-SKID SURFACE

When we observe the regular anti-skid surface under a microscope, we notice higher veins that create valleys making the surface rough, unpleasant to touch, and difficult to clean and maintain.

Low  
Maintanance

## Hybrid+ Technology

### TOWARDS A BETTER YOU

While our control over the happenings in the world outside is quite limited, we must surely take responsibility of safety within our own happy place. Today, one's safety, health and wellness are amongst the greatest concerns globally, and this has given us an opportunity to innovate, and to come up with unique solutions that either eliminate the challenges we face each day.

Utilizing our latest production systems, we introduce you to a technology that removes uncertainties or doubts involving safety within your home - 'Hybrid Technology'. The technology helps the product surface repel any liquid and does not allow unwanted or harmful living organisms to stay or grow. This water repellent and anti-bacterial surface created with 'hybrid+' requires the lowest maintenance.

With the tiles of the 'Casayard Collection' at your home, you won't be worrying about your toddler getting a bacterial infection or your grandparents slipping on the wet floors as the surfaces of 'Casayard' are anti-bacterial and anti-skid.

## [ Application Approach Area ]

## SURFACE FOR EVERY AREA

- |   |   |
|---|---|
|  RESIDENTIAL   |  SHOPS         |
|  GARDEN & POOL |  MALLS         |
|  HOTELS        |  PUBLIC SPACES |
|  OFFICE        |  AIRPORTS      |
|  RESTAURANT    |  TRAIN STATION |

## [ Technical Plus Factors ]

01 Impact Resistant

02 Scratch Resistant

03 Liquid Repellent

04 Frost & Fire Resistance

05 Stain Resistance

06 UV Resistance

07 Anti Alga

08 Anti-Slip

The most important requirement in these modern times is the urgent need for hygiene. These tiles from Casayard collection are easy to clean, providing you a germ-free surface. It is also resistant to water, heat, fire, chemical, impact and much more making it the ideal choice for any space.

## OUR NAME STANDS FOR TECHNICAL AND AESTHETIC EXCELLENCE.

Around the world, we proudly promote materials that best express that Made in India aesthetic, style and technical excellence.

On the international market, our name is synonymous with Full body tiles technical porcelain stoneware that offers extremely high technical and aesthetic performance. We transform top quality raw materials into ceramic projects able to interpret the many requirements of a continuously evolving world.

Tiles of India is the certified brand of origin which exclusively marks all products fully manufactured in India representing the decades old value system of the Indian Ceramic Industry. We support all those values promoted by the Indian Ceramics code of ethics, from **100% Indian production to social and environmental responsibility.**

**100% ISO 9001:2015 certification** is internationally recognised and represents a guarantee of the excellence and quality of the management system. CASA TILES decided of its own accord to undertake this important process, adopting a set of rules, responsibilities and checks to improve the efficiency of processes and customer satisfaction, to boost its competitiveness and maintain compliance with the highest quality standards.

### SAFETY SYSTEM MANAGEMENT

The health and wellbeing of employees are crucial priorities for CASA TILES. The attainment of ISO 45001 certification strengthens a business culture that sees safety not simply as a question of regulatory compliance, but as an essential part of working processes. Regulation is a necessary tool for generating a new model of sustainable competitiveness that can improve company performance across the board.

## ECO-SUSTAINABLE DEVELOPMENT

### ENVIRONMENTAL MANAGEMENT

CASA TILES conforms with the environmental regulations envisaged by the ISO 14001 certification. This certification measures and controls the reduced environmental impact of production sites, through an environmental management system based on strict parameters.

### CASA TILES CONTRIBUTES TOWARDS ENERGY EFFICIENCY THROUGH:

- 100% recycling of waters used
- 100% recycling of unfired and fired waste
- 100% recycling of packaging and pallets
- 60% recycling of waste.

### LOW ATMOSPHERIC GAS EMISSIONS

- 100% Water Consumption Savings
- 100% Recycling of Unfired Waste
- 100% Recycling of Fired Waste
- 100% Recycled Packaging
- 70% Recycling of Industrial Waste
- Noise Pollution Monitoring
- 100% Recycled Pallets

LOW ATMOSPHERIC GAS EMISSIONS

100% WATER CONSUMPTION SAVINGS

100% RECYCLING OF UNFIRED WASTE

100% RECYCLING FIRED WASTE

100% RECYCLED PACKAGING

90% RECYCLING OF INDUSTRIAL WASTE

NOISE POLLUTION MONITORING

100% RECYCLED PALLETS

IMC is a voluntary certification system, for the design, construction and management of high performance sustainable buildings; it promotes an integrated design system that concerns the whole building. It is developed by the U.S. INTERNATIONAL MANAGEMENT COUNCIL (USIMC), an association which provides a global approach to sustainability, providing recognition for virtuous performance levels in key areas of human and environmental health. The system is based on rating credits for each of the requisites featuring the sustainability of the building. The sum of the credits composes the certification level achieved.

# Casa Focus on quality

## Quality assurance procedures

Superior physical and chemical characteristics – together with beautiful aesthetics – are the distinguishing feature of Casabella Collection as of Casa Tiles.

To achieve the highest quality standards Casa exploits decades of experience in ceramic clay and minerals to devotes significant resources to continuous improvement.

Casa plant in India is designed by an Italian executive and an Indian company – exploits the latest Italian machinery to manufacture high-quality tiles.

The plant has a semi-high degree of automation, as required to consistently achieve the high levels of quality demanded by sophisticated customers in India and internationally.

According to the best practice, quality standards refer to the norms included in ISO and all tests are carried out by renowned laboratories in India, accredited according to international norms.

At Casa plant, we run tests on all raw materials, semi-finished goods and end products through the whole production process under coordination of the Quality Assurance Department.

To get the best possible result, the company has devised an integrated set of rules, named Casa - **Tiles Reinforcement System** for quality assurance procedures (TRS), to control all aspects of tiles manufacturing, that determine the physical and chemical characteristics of products.

TRS include measurement processes, benchmark values and operating procedures for:

- **Chemical characteristics of raw materials**, asking for every single shipment is tested before the raw material enters into production process.
- **Intrinsic physical properties of tiles**, such as caliber and dimensions, orthogonality, planarity, water absorption and breaking strength.
- **Usage-related properties of products**, such as resistance to scratch and abrasion, thermal shock resistance, resistance to acid, stains, household chemicals and slippery.

Chemical characteristics of raw materials

Intrinsic physical properties of tiles

Usage-related properties of products

## OUR SUSTAINABILITY MODEL

100% Natural Gas  
Consumption

Maximum Recycling of  
Unfired Waste

Maximum Use of Natural  
Resources

100% Recycled Packaging

100% Recycled Pallets

### OUR "GREEN EFFORT"

Using only recycled paper and reduction of inks used to help our mother nature. It might be small, but it's the little effort that counts.

# Full Body Tiles - the right choice

## Ease of Installation

### Simple to cut and drill

The particular composition of the mass facilitates cutting, drilling and bevelling operations.

### Quick to install

Lightness and ease of cutting, drilling and bevelling reduce installation times and costs.

## Hygiene

### Hygienic

They're hygienic and prevent the proliferation of mold and bacteria.

### Easy to clean

Full body tiles can be cleaned with just warm water or mild detergent.

### Stain resistant

Full body tiles do not retain dirt or stain.

### Resistant to chemical agents and detergents

Full body tiles resist the most aggressive detergents.

# Full Body Tiles - the right choice

## Practicality

### Waterproof

The surface of full body tiles is waterproof.

### Don't change when exposed to light

Full body tiles don't fade or change color when exposed to light.

### Long

Resistance, ease of cleaning and permanent colors means that there's practically no limit to the tiles' durability.

## Health And Safety

### Prevent bacteria growth

Full body tiles don't foster the growth of molds or bacteria.

### Don't release toxic substance

No release of allergens, VOCs or other harmful substances into the environment.

### Zero

Full body tiles contain no PVC, plastics, or petroleum derivatives.

### Safe

Non-flammable, don't release harmful substances, unalterable over time.

### Non-deformable Fireproof

Even when exposed to light, Full body tiles are humidity, and heat they maintain non-flammable and do not burn. Their original appearance and flatness over time.

## Disclaimer

Casa reserves the right to delete & amend either totally or partially, any of the colours, shapes, sizes, references and other technical specifications contained in this catalogue at anytime. The colours of tiles shown in this catalogue are purely illustrative to printing process. Please refer actual sample before final selection. The details of sizes, colours and references should be verified for typographical errors.

## CLEANING & MAINTENANCE

TYPE OF STAIN	CHEMICAL PRODUCT	EXAMPLE
<b>Grease</b>	Alkaline - Solvent	Detergent
<b>Oil</b>	Solvent	Ammonia, Baking Soda
<b>Ink</b>	Oxidant - Solvent	Alcohol, Liquid Bleach, Nail Paint Remover
<b>Rust</b>	Acid	Hydrochloric Acid, Vinegar, Red Harpic
<b>Lime</b>	Acid	Descaling Reagent, Hydrochloric Acid
<b>Cement</b>	Acid	Hydrochloric Acid
<b>Wine</b>	Alkaline	Ammonia, Liquid Bleach
<b>Coffee</b>	Alkaline - Solvent	Ammonia, Liquid Bleach
<b>Rubber</b>	Solvent	Alcohol, Thinner
<b>Plaster</b>	Acid	Hydrochloric Acid
<b>Candle Wax</b>	Solvent	Alcohol, Thinner
<b>Iodine</b>	Oxidant	Liquid Bleach
<b>Blood</b>	Oxidant	Liquid Bleach
<b>Ice Cream</b>	Alkaline	Liquid Bleach

Our products are non porous (due to their high quality raw materials, stringent production parameters and state of the art technology), hence any dust or deposited waste cannot penetrate the surface. For most cases only a damp cloth is sufficient for cleaning. Regular cleaning highlights the aesthetic features of the surface and gives it exceptional shine. For highly aggressive cleaning caused by some common food and substances follow the table below.
