ONE SURFACE, MANY POSSIBILITIES

CASA STEP
READY TO INSTALL FULLBODY STEPS

READY TO INSTALL STEP AND RISER

Staircases are not designed for their functionality alone. These practical units are also interesting from a design perspective and a defining feature in houses, rooms, hallways, and more. Casa Step Full Body Step and Riser comes in multiple colors, shades, and anti-skid surfaces to suit your interior and exterior spaces.

300x1200mm STEP | 200x1200mm RISER

Highly durable, ideal for heavy traffic and commercial areas indoors and outdoors.

Easy and speedy installation. Better than natural stone cutting and finishing on site.

Embossed capsule lines provide extra grip for enhanced safety near the step edge and unique full bull nose edges.

It provides higher strength and durability and offers assurance to replace natural stones in a confident way with the highest abrasion resistance.

Ensures ten times superior surface protection against wear and tear over natural stones.

Available in 6 beautiful Salt & Pepper shades to suit building theme, decor, and desired contrast.

Available Sizes :

Step 300x1200mm

Riser 200x1200mm

Landing Tile Area 600x1200mm

FEATURES & BENEFITS

CONCEPT FOR DESIGNING

Casa Step & Riser are available in different designs and colours. As high-quality tiles, they meet the technical requirements of different standards for the production of stairs. The comprehensive concepts comprising basic, décor and functional tiles can be used for a durable and aesthetically pleasing design of the entire indoor & outdoor stair area.

SAFETY FOR SENIOR CITIZENS, THE PHYSICAL DISABLES, AND CHILDREN

Safety is always the number one priority. It is safe enough for senior citizens, physically disabled, and children. In addition, to slip resistance in compliance with the applicable standards, Casa Step Full Body Vitrified Tiles offer particular durability and also easy-care properties. These full-bodied tiles come with bull nosing and tread lines that make them skid-resistant and much safer than conventional stairs.

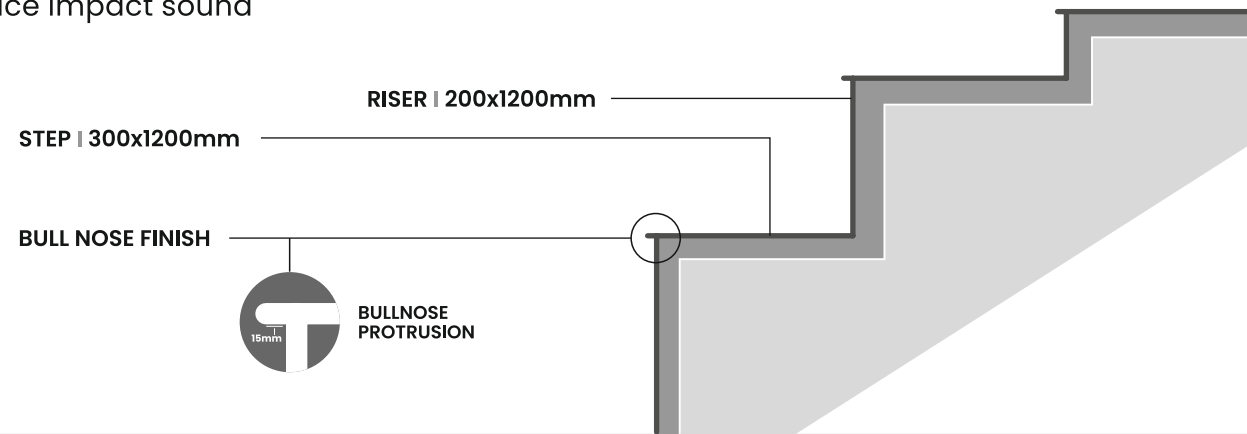

LONG LASTING & EASY MAINTENANCE

Casa Step is full-bodied, vitrified tiles, which means they absorb very low water and are impervious to weather or wear and tear-induced damage. Fit them and forget them for years of trouble-free performance.

EASY INSTALLATION

No more handling issues. No more labor-intensive on-site installations, no more wastage costs. Casa Step and Riser can be easily and speedily installed on-site. Chipped and worn-out staircases and the constant need for polishing and repairs are all things of the past.

Prefabricated stairs with bearing surfaces insulated to reduce impact sound

Casa Steps are available in 300x1200mm. These can be used in full size and cut size, depending on the requirement. While the riser tiles are available in the convenient size of 200x1200mm, for stairs requiring higher width, contrast shades can be used on either side to get the wider stairs.

GRANITE	CASA STEP
Variation in shades, color & density	No color or density variation
Has to cut in sizes	Ready to lay tiles
Bull-nosing, half nosing needs to be done	Ready bull nose
Longer installation time	Easy to install
High Cost	Lower cost than granite
Affected by weather, hot & cold	Impervious to weather
High maintenance	Zero maintenance
Cut & grooves need to be done	Ready embossed grooves

* Vitrified tiles have resistance to most stains/chemicals, but it is recommended to take due care while laying and for day-to-day maintenance.

Resistance to acids & alkalis
(Exception Hydrofluoric Acids & its Compounds)

- Colours in the catalog are as accurate as the printing process allows
- Sizes mentioned in the catalog are nominal sizes only.
- Conforming to ISO requirements, technical specifications for Casa tiles are applicable only for 1st quality tiles.
- Please inspect all tiles prior to installation; the company will not entertain complaints once tiles are laid/fixed.
- For better laying, please follow the instructions on the packaging box.

Why is Casa Step the new benchmark in the world of staircases?

Natural stones have been the mainstay of staircases. These stones are not easy to install and are slippery. Moreover, due to a lack of uniformity in size, there is a higher wastage cost. Casa Step is a revolutionary tile that sidesteps all the complications associated with natural stones. Also, the Casa Step comes in a convenient size of 300x1200mm Step with bull nosing and tread lines, 200x1200mm Riser and 600x1200mm Landing area tiles in matching colour. These sizes ensure it meets the design requirements of most staircases.

How is Casa Step different from others?

Safety and durability are the cornerstones of Casa's Step. As a full-bodied Vitrified Tile encompasses a high degree of strength with anti-skid and stain resistant properties, which make it a safe and excellent choice, especially for people with ambulant disabilities.

What are the advantages of full bull nose edges?

Casa Step is a Full Body Bull Nosed, Vitrified Step Tile. The unique bull-nosing makes the staircase safer and more comfortable to step on. It also helps to prevent chipping along edges and gives the staircase an aesthetically pleasing look.

What is the purpose of embossed tread lines?

The embossed tread lines provide extra grip when stepped on, especially near the edges of the steps. This ensures higher safety, preventing people from falling and risking injuries.

What are the benefits of thicker tiles?

For staircases, it makes sense to have strong tiles, which Casa Step is owing to its thickness. It ensures safety, lends confidence, and assures replacement to natural stones.

What are the other benefits of using the Casa Step?

The ease and speed of installation, low water absorption (<0.05%) with advanced stain resistance technology. Also, due to its high abrasion resistance, it provides ten times more surface protection than natural stones.
