FULLBODY TILES

The Enduring Language of Natural Stone

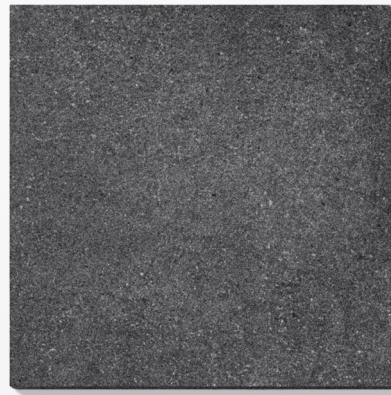

Inspired by landscapes shaped through time, the Artstone Series captures the strength, texture, and quiet beauty of natural stone. Its subtle mineral variation and balanced detailing create surfaces that feel authentic, architectural, and timeless.

Made using advanced Hybrid Plus Technology, Artstone combines full-body material character with refined surface definition. Its natural stone-inspired digital punch recreates gentle depressions and irregular textures, allowing light and shadow to bring depth and realism to every tile.

The elegant matt surface softens reflections and enhances the collection's tactile, mineral appearance, while the substantial 15 mm thickness gives it a strong and confident presence. Its full-body construction continues the colour and composition through the tile, reinforcing consistency and enduring character.

More than a reproduction of stone, Artstone is an interpretation of nature's process – the pressure of the earth, the passage of time, and the beauty of gradual transformation.
